

After-School DMA Parent Options

Device Management Application (DMA) software is installed in students' PLDs to provide a safer digital learning environment, and to prevent misuse of the device. Parents/guardians can choose between these 3 options to suit their preferences for managing the PLDs **after school hours**.

| | DEFAULT | OPTION A Modify DMA settings | OPTION B Disable DMA settings |
|--|---|---|---|
| <u>FILTERING OF WEB CONTENT</u> | MOE / School sets the level of filtering | Parent can apply additional filters | No content filtering |
| <u>CONTROL OF APPLICATIONS</u> | Parent cannot install additional applications | Parent can install additional applications* | Parent can install additional applications* |
| <u>LIMITS TO SCREEN TIME</u> | School sets limits for screen time | Parent can modify limits for screen time | No limits to screen time |
| <u>MONITORING OF CYBER ACTIVITIES</u> | Parent can monitor child's browser history | Parent can monitor child's browser history | No data is collected Parent cannot monitor child's use of the device through the DMA |

Opting for the Default DMA setting for after-school use is the best option for parents who prefer not to or do not feel ready to manage their child's device use on their own.

What's next?

- School will inform parents about how to select their After-School DMA Parent Options.
- Should the need arise, parents can request to change their DMA option subsequently by sending an email to Mr Lee Yew Ming (lee_yew_ming_a@moe.edu.sg).

**Applications installed by parents/guardians and/or students after school hours will be disabled during school hours.*
